

Annex 12 - Planning

- A. The West Virginia Radiological Emergency Plan for the Beaver Valley Power Station will be reviewed on an annual basis and updated, as needed. The update will take into account any changes identified by drills, exercises, and changes of regulations. These changes will be forwarded to all organizations and individuals with responsibilities for implementation of the plan.
- B. The emergency telephone numbers that will be used during an incident at the nuclear facility will be checked and updated quarterly.
- C. WVDHSEM is responsible for the overall review and update of the state plan, with the updating of telephone numbers updated quarterly.
- D. Any changes to the plan affecting Hancock County will be coordinated with the Director, HCDHSEM. Changes concerning the Beaver Valley Power Station will be coordinated with the Emergency Preparedness Manager at the BVPS.
- E. Plan updates and custodial changes are completed by the Radiological Emergency Preparedness Program Manager, or designee. Additional copies of this plan or questions may be addressed to the plan custodian or REP staff in WVDHSEM.
